

Team Report

Team: Electra

Dustin Ward

Jared Sisco

Neville Leung

Team Retrospective

The team was very proficient in assigning and completing tasks in a timely manner. The design was completed in one meeting. Communication was concise and efficient, and group members took it upon themselves to complete portions of the project. We were not very good at our initial formation, as the team waited until the last two weeks to begin on design and management tasks. However, this won't be an issue moving forward because the team has not met and established proper communication methods.

Team Member Contributions

Dustin Ward

During this phase of the project I was an active contributor to multiple portions of the project. I was involved in our initial design session by proving ideas and input based on other members suggestions. I also lead the creation and formatting of our project documents.

Jared Sisco

I was in charge of completing the UML diagram and sequence diagrams for this phase of the project. While also involved in constructing the initial design and providing ideas/ concepts.

Neville Leung

In this phase of the project, I was incorporated to support ideas and input to other members. Looking forward to take more participation on implementation phase.
